è

## **DETAILED ACTION**

The response to the restriction requirement filed 12/15/05 has been acknowledged and entered.

## Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-23 are indefinite and confusing because it is not clear if the method as claimed refers to "forming brush" or to "clean the semiconductor wafers".

In claim 1, line 2, "the length" lacks antecedent basis. In claim 10, line 1, "the zeta potential" lacks antecedent basis.

In claim 23, line 2, "desired" is indefinite term.

3. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the cleaning steps.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (2003/0068317 or 2005/0112616) or Klaerner et al. (2003/0108879) in combination with Lofaro et al. (2002/0096191).

Lee et al.'317 or '616 disclose the polymer brush as claimed. See the abstract and the document in general.

Klaerner et al. disclose the polymer brush as claimed. See the abstract and the document in general.

Lee et al.'317, '616, and Klaerner et al. do not teach using the brush for cleaning semiconductor wafers as claimed.

Lofaro et al. disclose a method of cleaning wafers using sponge or brush. The reference discloses that using polyvinyl alcohol (PVA) brush or sponge for cleaning semiconductor wafers. See the abstract and paragraph 4.

It would have been obvious for one skilled in the art to use the brush taught by Lee et al. or Klaerner et al. for cleaning semiconductor wafer, because the brush as claimed comprises polyvinyl alcohol polymer (polyvinyl alcohol brush) which can be used for cleaning wafer as taught by Lofaro et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zeinab E. EL-Arini whose telephone number is (571) 272-1301. The examiner can normally be reached on Monday-Friday.

Application/Control Number: 10/698,323 Page 4

Art Unit: 1746

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on (571) 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
